**Subject:** RE: R9 and Class VI permits

Hi Molly, yes, please have Anhar reach out to me directly for questions about CES. Also, if Air Products is planning to submit a Class VI app for a project in R9, it would be helpful for them to brief us (and you) on their proposed project/timing. I am happy to convey this to Anhar when we talk. Thanks, David

**Subject:** FW: R9 and Class VI permits

Hi David,

DOE is asking for information on the CES project. How would you like to proceed with information sharing with DOE? Would you like us to suggest Anhar reaches out to you directly with any questions?

DOE also brought to our attention a potential new project in R9. A briefing seems like it would be helpful. Do you agree? We can also suggest that DOE reach out to you for this.

Best,  
Molly

**Subject:** R9 and Class VI permits

Hi Bruce and Molly,  
You guys have mentioned a permit application in R9 and I'm wondering if you could share more info about the project. We heard that it is a Clean Energy Systems project and DOE has funded them in the past, but this isn't one of our projects so anything you could share would be appreciated.

I also want to give you a heads up that there is another project happening in R9 (not a DOE funded project). We got an update from Air Products about it on Friday and I don't think they've reached out to EPA yet. I'd like to suggest to Air

Products that they brief you and R9, at your convenience, but wanted to touch base first to make sure that would be helpful?

Thanks,  
Anhar
